Experience

Luminosity Lab, ASU | UX Designer

Mar 2018 - Present | Tempe, Arizona

SCM(Ongoing) - A game to educate people in supply chain management skills in developing countries.

- Creating wireframes to teach 3 technical concepts.
- Conducting iterative user testing sessions.
- Designing the reward system, games and level structure, storyline and difficulty management of the game.
- Collaborating with professors, developers & designers.
- Helped set and manage project deadlines

Resonea - A product to track & improve sleep health.

- Researched multiple factors that affect sleep.
- Researched different ways to increase motivation and include gamification into self-tracking.

SolarSPELL, ASU | UX Design Intern

June 2018 - July 2018 | Tempe, Arizona

Digital Library Management System - A platform to upload, approve and organise files for digital libraries.

- Studied the existing manual process of managing the files in order to create a seamless digital process.
- Created mockups with pixel specs for development.

ThoughtWorks | Application Developer

Aug 2015 - Jul 2017 | Bangalore, India

Operational Insights - A web application for analysis and visualisation of operational data of ThoughtWorks for the leadership team.

- Took part in User Interviews for upcoming features.
- Collaborated with team's Lead UX and developers to verify the feasibility of prototypes.

Certification

Completed a course in **Information Visualisation** from Interaction Design Foundation - <https://goo.gl/ooss37>
